To whom this may concern,

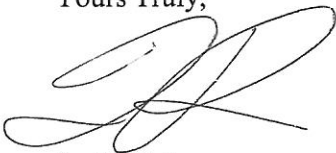

It is my pleasure to recommend Nolin Electric based on the work they have performed for Site Specific over the last two years on a number of construction projects.

Working with Nolin Electric is a consistently great asset from my standpoint as a general contractor. From the preconstruction through closeout phase of every project that we have been a part of together, Nolin has shown their ability to efficiently and neatly complete electrical projects of all sizes and difficulties.

From a management perspective, Nolin is able to provide a very detailed estimate and understanding of the challenges of any project and throughout construction is able to identify and overcome challenges in an efficient manner. Nolin's field personnel are also very knowledgeable and competent to perform electrical work of all types and sizes.

Nolin Electric has proven to be very reliable when their services are required immediately or on an emergency basis and has never failed to deliver on a promise or an obligation. Overall, I would personally recommend Nolin Electric to anyone without hesitation as the level of service provided by this company is above and beyond what is present in the industry today.

Yours Truly,

Zack Pilcher
Project Manager
