RE: Nolin Electric, Inc.

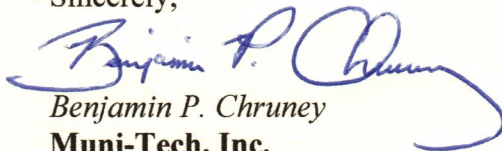

To Whom It May Concern:

I am writing you this letter as a company reference for the electrical company, Nolin Electric, Incorporated, with whom I have had a direct working relationship over the past 3 years but have also had a successful working relationship for over 10 years with Joe Therien, a primary electrician employed by Nolin. As they are looking for new clients and to expand further their business, I am sending you a recommendation to you of the services they may be able to offer you.

Nolin Electric and Muni-Tech, Inc have collaborated on many Accident Recovery Efforts in which motor vehicle accidents caused damage to light poles, controllers and traffic signals which often times required immediate response on their behalf. These projects have spanned a range from very simple and straight forward to very complex and intricate. They are a friendly, economical and efficient electrical company, one that I would recommend to any local business who need electrical work completed in a reliable and professional manner.

I thank you in advance for your consideration of using the services of Nolin Electric, Inc., I assure you that you will not be disappointed in what they can offer for their services.

Sincerely,

Benjamin P. Chrunev

Muni-Tech, Inc.
