To Whom It May Concern:

It is with great pleasure that we recommend Nolin Electric, Inc., who has completed many electrical projects for us over the last twenty years.

A recent subcontract has been awarded to them for the renovation of the Carpenters Union Building in Warwick, RI. The project includes a complete interior renewal with new lighting, fire alarm and power for the new HVAC system. The project will take twelve months to complete.

The team at Nolin has worked closely with our superintendents and project managers to help build successful projects. This communication along with the installer's knowledge and ability to produce on site leads to the projects finishing on schedule and within budget. The projects have run smoothly from start to finish and we and the Owners are pleased with the outcome.

We have worked with Nolin on many jobs over the last 20 years with subcontracts ranging from \$ 25,000 to \$ 500,000.

We continue look forward to working with them on future projects. If you have any further questions, please do not hesitate to contact me.

Sincerely,

E. W. Burman, Inc.
